

# GOBIND SINGH MATHAROO

I'm Gobind, a developer & geek from India, looking for new job opportunities. I'm currently in final year of my bachelor's degree in computer science and following my passion of learning various software development technologies and languages. I try my best to pour life into ideas and bring them to the realm of reality. In the digital world, knowledge is infinite. I wish to keep on learning and practice everyday, but most importantly, I love working with diverse people.
